

MSc. in Cartography & Geoinformatics, BSc. in Geosciences

Current Location Bogotá D.C, Colombia | [Portfolio](#) | [LinkedIn](#)

Phone (+57) 304 291 4247 - Email f.camacho10@uniandes.edu.co - Nationality Colombian

Geospatial data analyst with 5+ years of experience turning complex spatial and business questions into reproducible analyses, interactive tools, dashboards, maps, and client-ready insights. Dual master's degrees in Cartography and Geoinformatics, with hands-on experience in Google Earth Engine, ArcGIS, Python, JavaScript, SQL, remote sensing, and data visualization. Currently lead the technical update of the [Forest Landscape Integrity Index](#) (FLII) and develop decision-support products for WCS's HIFOR initiative. Previously supported 900+ English-speaking Esri customers worldwide, translating technical needs into practical solutions.

Skills

Data analysis & automation: Python (ArcPy, Rasterio, GDAL, Xarray/rioxarray), SQL, R, Excel and Google Sheets; data extraction, transformation, spatial/statistical analysis, QA and cross-validation | **Geospatial platforms:** Google Earth Engine; ArcGIS Pro/Desktop, Online, Enterprise and Dashboards; QGIS, eCognition and Pix4D | **Web & Visualization:** JavaScript (OpenLayers, CesiumJS, Leaflet and Mapbox), HTML/CSS; interactive maps, dashboards, web applications, cartography and data storytelling | **Delivery:** Requirements gathering, reproducible workflows, technical documentation, client support, stakeholder presentations and cross-functional remote collaboration

Education

Sep 2022 – July 2024
Graduated with Honors

MSc, Copernicus Master in Digital Earth – Double Degree

Austria & Czech Republic

Awarded with a full **Erasmus Mundus scholarship** for the Copernicus Master in Digital Earth, a full-time, double-degree program co-funded by the European Union.

MSc. in Cartography at Palacký University Olomouc (August 2023 - July 2024)

- Acquired knowledge in Cartographic Methods, Map Production and Composition, Color and Typographic Principles, and JavaScript Map Libraries (Leaflet and Mapbox). Developed proficiency in Infographics, Data Visualization, and 3D Modeling using tools like ESRI Products, Adobe Suite, Blender, and the CesiumJS library.
- **Key Courses:** Principles of Geovisualization | Thematic Cartography | Design in Geovisualization | Web Cartography | 3D Visualization
- **Projects:** [Maps Portfolio](#) | [Patagonian Glaciers Monitoring Application \(Google Earth Engine\)](#) | [3D Patagonian Glaciers Viewers \(CesiumJS\)](#) | [Natural Areas and Ecotourism in Colombia](#)

MSc. in Geoinformatics at Paris Lodron University of Salzburg (September 2022 - June 2023)

- Developed skills in Remote Sensing, Big Data, Data Analysis, Spatial Data Processing, and Spatial Data Infrastructures through the usage of ESRI Products, eCognition, Google Earth Engine, SQL, Python (GDAL, rioxarray), JavaScript (OpenLayers), HTML, and CSS.
- **Key Courses:** Remote Sensing | Big Earth Data Concepts | Spatial Statistics | SDI Services Implementation
- **Projects:** [Snow Cover Area and Land Surface Temperature Analysis for Austria Skiing Areas with Google Earth Engine](#) | [ThermoSalz Web Application](#) | [Analysis of Suitable Buildings for Solar Panels in Salzburg](#) | [Chicago Crime Dashboard](#)

Jan 2015 – Oct 2019

BSc. in Geosciences at Universidad de los Andes

Bogotá, Colombia

Awarded with a full scholarship for a bachelor's degree in Geosciences.

- Acquired broad knowledge in Geoinformatics and Remote Sensing, including expertise in Drone Imagery Acquisition and Analysis, Geology, and Geochemistry. Proficient in utilizing Esri Products, Python, MATLAB, and PCI Geomatica for advanced geospatial data analyses.
- **Key Courses:** Remote Sensing, GIS and GPS | Computational Methods | Geology
- **Projects:** [Multitemporal analysis of mining areas in the municipalities of Lenguaque and Guachetá](#)

Employment History

Dec 2024 – Present	Natural Climate Solutions Data Analyst	<i>Wildlife Conservation Society – Bogotá, Colombia</i>
	• Lead the technical update of the Forest Landscape Integrity Index (FLII), producing annual global layers for 2018-2024; develop reproducible Google Earth Engine workflows for time-series processing, QA, trend analysis, and dataset publication. • Design and maintain Google Earth Engine applications and ArcGIS dashboards that translate complex FLII and HIFOR results into accessible maps, site comparisons, statistics, and decision-support products for scientific and program teams. • Review and cross-validate global and regional datasets, investigate anomalies, document methods and assumptions, and communicate findings through reports, maps, dashboards, and presentations. • Collaborate with scientists and program teams across countries to translate analytical needs into reusable workflows and clear recommendations for HIFOR	
Mar 2023 – Jul 2023	Remote Sensing & GIS Intern	<i>Spatial Services – Salzburg, Austria</i>
	• Contributed to dwellings extraction in refugee camps for Médecins Sans Frontières (MSF), using high-resolution and very high-resolution imagery with deep learning methods such as Mask R-CNN and Segment Anything by Meta AI. • Created flood and burned forest areas mapping algorithms within Google Earth Engine. • Developed Geoprocessing Tools with ArcPy for Data Management.	
Mar 2023 – Jul 2023	Remote Sensing & GIS Intern	<i>Termatics – Salzburg, Austria</i>
	• Led the processing of ECOSTRESS and Landsat thermal data to analyze surface temperature changes and assess solar potential in Salzburg, Linz, and Graz, Austria. • Developed a web application using OpenLayers to facilitate interactive access to temperature data for both scientific and general users. • Participated in discussions with the European Space Agency (ESA) on solar energy needs and the technical requirements of the application.	
Feb 2022 – Aug 2022	Senior GIS Analyst	<i>Audubon Companies – Bogotá, Colombia</i>
	• Led the creation and optimization of GIS workflows, Python scripts, and cartographic methods to map utility infrastructures and perform disaster risk analyses. • Modeled and analyzed potential risks of pipeline ruptures, methane leaks, and fluid dispersion. • Supervised the production of printed and online maps for disaster prevention.	
Nov 2019 – Feb 2022	GIS Support Analyst	<i>Esri Colombia – Bogotá, Colombia</i>
	• Provided high-quality technical support for Esri's English-speaking customers worldwide, focusing on software setup, data management, spatial analysis, cartographic products, and web application development. • Resolved over 900 support cases related to ArcGIS Desktop, Pro, and Online and applications such as ArcGIS Field Maps and ArcGIS Survey123. • Achieved an outstanding overall qualification of 4.8/5.0 from assisted clients for two years in a row.	

Courses and Certifications

Apr 2022 – Jun 2024	<u>23 E-Learning Courses (SQL, Python, JavaScript, Adobe Suite)</u> <i>Issued by Platzi</i>
Oct 2021	<u>ArcGIS Desktop Associate 19-001</u> <i>Issued by Esri</i>
Sep 2021	<u>ArcGIS Pro Foundation 2101</u> <i>Issued by Esri</i>
Since Dec 2019	<u>126 Esri Courses Completed</u>

Honors and Awards

Languages

Sep 2022 – July 2024	Erasmus Mundus Joint Master fully funded Scholarship <i>European Union</i>	Spanish - Native
Oct 2019	BS Honor Thesis (4.83/5.00) <i>Universidad de Los Andes — Bogotá, Colombia</i>	English - TOEFL iBT 107/120 (C1)
Jan 2015 – Oct 2019	Undergraduate scholarship: "Quiero Estudiar Escala" <i>Universidad de Los Andes – Bogotá, Colombia</i>
